PROFILE

AI Engineer with 4+ years of experience in Python, specializing in building intelligent applications and scalable backend systems using FastAPI and Django. Experienced in integrating LLMs, designing microservices, and developing data-driven solutions. Passionate about creating AI-powered products and continuously exploring modern technologies to solve real-world problems.

SKILLS

- Management Skills
- Critical Thinking
- Communication Skills
- Time management
- Team collaboration
- Project planning
- Code Review & Quality Assurance

TECHNOLOGIES

- python fastapi
- django
- microsoft agent framework
- rag pipelines
- azure cloud infra
- azure functions
- langchain
- sqlalchemy
- pydantic
- redis
- celery
- azure cosmos db
- azure blob storage
- azure container app
- azure functions
- azure service bus
- azure content understanding
- document intelligence

EDUCATION

- **Bachelor of computer science** 2017 - 2020
Built a strong foundation in programming, data structures, algorithms, and database systems. Developed practical projects and gained core problem-solving skills that support my work in software development and AI engineering.
- **Master of computer application** 2023 - 2025
Focused on advanced software development, system design, and modern technologies, with an emphasis on building scalable applications and exploring AI-driven solutions.

WORK EXPERIENCE

orion innovation pvt ltd. 2025 - present

Software engineer - AI

- Worked in both R&D and Production teams, focusing on AI-driven application development and cloud-based solutions. Researched and developed projects using the Microsoft Agent Framework and built scalable RAG (Retrieval-Augmented Generation) pipelines integrated with Azure OpenAI. Implemented background task processing using Celery and worked extensively with Azure services including Cosmos DB, Blob Storage, Service Bus, Azure Container Apps, and other platform services. Also utilized Azure Content Understanding and Azure Document Intelligence with custom models for intelligent document extraction and processing workflows.

Cloudium software pvt ltd 2022 - 2025

Associate consultant

- Worked on the project in microservices architecture, developing and managing independent modules including authentication and authorization systems integrated with Google Cloud services. Experienced in implementing Redis and Celery for caching and asynchronous task processing, along with designing and optimizing advanced SQL queries and database structures for high-performance applications. Also led and mentored a team of 4 junior developers, ensuring efficient collaboration and timely project delivery.

primalcodes technologies 2021 - 2022

Junior python developer

- Independently developed and delivered 3 e-commerce applications using Django, handling the complete development lifecycle from backend architecture design and implementation to deployment and maintenance. Gained strong expertise in scalable system design early in my career, with hands-on experience in API development, database management, and application deployment. Also worked with AWS cloud services and quickly adapted to new technologies and deployment workflows to ensure successful project delivery.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. I take full responsibility for the accuracy of the details mentioned in this resume.
